THE SECURITY PROFESSIONAL SUPPLIER

Disklock Pro Cylinder

The Abloy Disklock Pro cylinder features the latest developments in professional high security cylinders. It incorporates a symmetrical key shaft and has a two-way function. The Disklock Pro Cylinder is compatible with all commonly used locks.

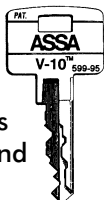

ASSA

Twin V-10

The Twin V-10 offers virtually unlimited keyways to the end-user on a geographically exclusive basis. Brand new patents assure each user of protection against unauthorized key duplication and when combined with the physical security of a U.L. listing, the result is uncompromising control. The Twin V-10 has master keying capabilities of up to 170,000 changes.

Assa Twin/V-10 cylinders are listed in accordance to the standards of UL 437 for pick and drill resistance and protected by one or more US utility patents or patents pending.

SNS: Sub-Assembled, No Sidebar (Uncombined cylinder without sidebar and sidebar springs. Includes sidepins, sidepin, tailpiece and pin chamber closure.

SYSTEM 4000

Key Control

- ▶ Ability to control unauthorized duplication of keys and ability to de-authorize lost or terminated keys.
- ▶ Keys and controller contains microprocessor that is programmed with a unique electronic restricted keyway and identity. The key transmits this information with the user's parameters to the lock by secure encrypted infrared optics.
- ▶ New user keys can self-enable themselves in authorized controllers.
- ▶ Start and stop date/times can be programmed into the key for applications such as construction keying, temporary keys, high employee turnover environments and dormitories.

Time and Access Control

- ▶ Limits each key holder to specific secured areas only during designated times.

Audit/Key & Lock Usage Recording

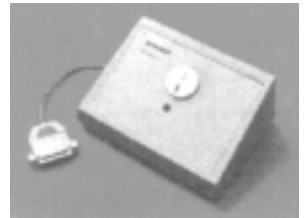

- ▶ The controller records that last 1000 key access identities, date and time.
- ▶ The key records the last 45 doors accessed including date and time.

Flexible Integration Retrofits Easily

- ▶ System can retrofit and/or integrate into existing or new doors and hardware and into many existing access control systems.

Installation & Maintenance Ease

- ▶ High security - not high cost! No need to constantly re-pin cylinders, or replace existing locks, or update electronic card readers and/or locks.
- ▶ Battery powered lock has 2-3 year life expectancy. Controller gives distinctive beeping signal at low battery level.
- ▶ Keys can be reprogrammed over and over allowing them to serve many key holders and many functions.

Master Lock®

Key Control System

The new Master Lock  (ML®) Key Control System makes key controlled security a cost-effective possibility for virtually any application, thanks to an innovative, added cylinder locking feature. An exclusive range of cut keys, produced from protected, proprietary key blanks, is available with every  system.

Features:

› **Patent-pending key system for absolute key control.**

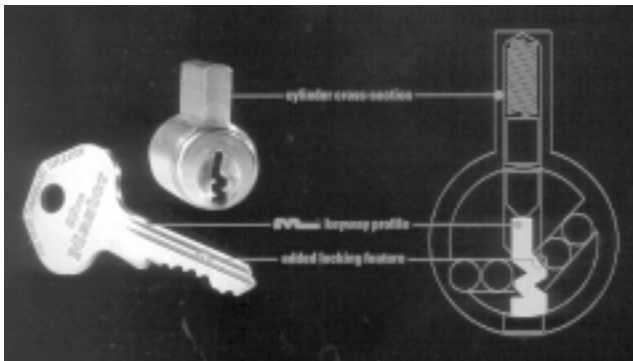

- Exclusive key and cylinder design guarantees system protection.
- Allows for the creation of numerous one-of-a-kind “virtual keyways”.
- Operation keys can be dedicated to each registered end user facility.
- Key blanks are completely restricted, preventing unauthorized duplication.

› **Innovative cylinder with additional locking feature keeps price down while boosting padlock security.**

- Solidifies your padlock security system and does so cost-effectively.
- Free record keeping service is available for all registered system end users.

› **Available in the full range of Master Lock commercial padlocks, including:**

- Laminated steel pin tumbler padlocks of all sizes, for all applications.
- Pro Series® High Security iron shroud and solid steel padlocks.
- Pro Series® Weather Tough® and solid brass padlocks.
